

GENERAL ORGANIZATION OF PLACEMENTS: PHYSIOTHERAPY

1st year

Introductory Placements

Credits: 3 ECTS

Semester: 2nd

Length of placement: 3 weeks

Main features of the placement:

The subject constitutes the establishment of the first contact of the student with the professional world. It is developed in two clinical areas: community environment and the institutionalized patient's environment. The student must integrate the knowledge acquired in the subjects Clinical Simulations 1 and 2, Physiotherapy Fundamentals 1 and 2 (taken in the first year of the Degree in Physiotherapy) from which the basic fundamentals of physiotherapy are derived in terms of the interventions of prevention, promotion and basic attention of the person. During the internship the student will demonstrate: the patient as a person and environment; Interpersonal communication; Introduction to care in Physiotherapy with the real patient: anamnesis and global assessment; The clinical history and life history; The interdisciplinary team; Health promotion and disease prevention.

Specialties:

- Geriatrics

2nd year	
Advanced Placements 1 & 2	
Advanced Placements 1	Advanced Placements 2
Credits: 3 ECTS	Credits: 4 ECTS
Semester: 1st	Semester: 2nd
Length of placement: 3 weeks	Length of placement: 4 weeks
<p>Main features of the placement:</p> <p>The advanced placement course establishes the student's second contact with the professional world.</p> <p>During the stay in the practice center, the student will perform the learning and tasks of the assigned center, under the mentoring and evaluation of a physical therapist who, in turn, will be his clinical tutor.</p> <p>The student must be able to integrate and put into practice the theoretical concepts consolidated in the theoretical classes in different rehabilitation centers and thus be able to unify performance criteria</p>	<p>Main features of the placement:</p> <p>The advanced placement course enables the student to consolidate his/her learning from previous placements.</p> <p>During the stay in the practice center, the student will perform the learning and tasks of the assigned center, under the mentoring and evaluation of a physical therapist who, in turn, will be his clinical tutor.</p> <p>The student must be able to integrate and put into practice the theoretical concepts consolidated in the theoretical classes in different rehabilitation centers and thus be able to unify performance criteria</p>
